

# RESEARCH PAPERS ON GENETICS

*The most downloaded articles from Journal of Genetics and Genomics in the last 90* Share your research data *• Data in Brief co-submission • MethodsX co-*

The topic of the first special section is pharmacogenomics, featuring eight articles on the current state of pharmacogenomics research and its implementation in the clinic. Is there a connection between allergies and human genetics? Can genetic code be confidential? Fighting HIV with gene mutations. Is it possible to choose the sex of a person before birth? Interesting genetics research topics Can dinosaur DNA be recovered? Choosing the right topic will also reduce the difficulty of writing a good research paper by ensuring that the topic has enough credible resources to research. Try out one of those: Replacement of genes and artificial chromosomes. The current Web Focus features a collection of the latest original and review articles on cardiovascular diseases, such as myocardial infarction, stroke, atherosclerosis, aortic aneurysm, cardiomyopathy, heart failure and hypertension. Previous page. List of popular genetics topics With any of the topic we list below, you will be able to write a good research paper on genetics. The Focus includes reports covering genetic research into identifying risk and associations with Breast Cancer, lung squamous cell carcinoma, adenocarcinoma, and cervical cancer in different populations, such as Korean, Chinese, Japanese and Amerindian. Focus Medical Genetics Series Web Focus As the leading genetics journals based in the Asia Pacific region, Journal of Human Genetics promotes research spanning the breadth of human genetics, including medical genetics and genomics. The first collection represents some of the most downloaded, highly cited articles published to date in the journal in a wide scope of medical genetics. Genetics as a ray of hope for children who have an intellectual disability. This Focus includes the latest research on obesity and diabetes, such as a report on the different variation of genes, common variants or polymorphisms that are associated with type-2 diabetes, comparative association studies between specific gene variants or polymorphisms with type-2 diabetes and obesity in different populations. Focus Pharmacogenomics: Recent advances and future directions The Journal of Human Genetics is pleased to present its first "special section" in the June issue of the journal. Focus JHG Commentaries and commented articles The Journal of Human Genetics is delighted to feature Commentaries, which provide narratives of interpretation, evaluation and opinion from area experts about the topics discussed in articles appeared in the same or recent issues of the journal. Choosing a topic of your genuine interest means joyful writing process and coming up with high-quality content. Are there any living cells in the gene? Genetics and its role in cancer studies. Genetic fund of the nation. These special sections are designed to bring together collections of papers on specific topics of interest; guest editors curate the section, inviting contributions from leading researchers in the field. Is it somehow possible to improve human personality through genetics?
